

Excel Module 3

**PivotTables, Conditional Formatting &
Sparklines**

Roadmap

1

PivotTables

2

Formatting

1

PivotTables

What are PivotTables

Faster

- Does everything you've already learned about analyzing data, just faster and more efficient.

Exploratory

- Aggregate and present data in many different ways, quickly - ideal for exploratory analysis.

Real limits

- Some options and charts available for Data Ranges or Tables don't work with PivotTables.

Core PivotTable skills

- Create a PivotTable to analyze worksheet data
- Use the Field List to arrange fields
- Filter data in a PivotTable
- Create a PivotChart

Further reading

- Video: Overview of PivotTables and PivotCharts - Microsoft Support
- Video: Basic tutorial on PivotTables and PivotCharts - YouTube

Practice files

Penguins PivotTables.xlsx and Exercises PivotTables.xlsx

— In this folder - try each feature yourself

**A PivotTable does everything
you've already learned - just
faster. The real skill is
knowing when to reach for
one.**

2

Formatting

Add quick visual information to tables

Conditional formatting

- Highlights information automatically, based on rules you set
- Official guide: Microsoft Support

Sparklines

- Tiny in-cell charts that show a data trend at a glance
- Official guides: Microsoft Support (create + use)

Video: replaced

Video: Conditional formatting & sparklines

— Replaced by an in-house screencast (2 Spanish/unofficial YouTube videos removed - see BUTI_2.0_Remaking_Plan.md §3.4, top production priority)

Practice file

Conditional formatting and sparklines.xlsx

— In this folder

PivotTables and conditional formatting turn a spreadsheet into an at-a-glance dashboard - once you know the basics, the tool does the heavy lifting.
